

# Are feeder jams bringing you to the breaking point? **VIBCO has a perfectly packaged solution.**

We're the **Vibrator Guys**.™

## Product Application Bulletin #432 Model SCR-60 Adjustable Speed & Force Electric Vibrator

### VIBCO'S SOLUTION

A VIBCO Application Engineer recommended that the customer install a VIBCO SCR-60 Adjustable Speed and Force Electric Vibrator above the feeder chute. The adjustability enabled the customer to get the right amount of vibration to ensure that the eggs aligned properly without breaking. Preventing breakage greatly reduced product waste and eliminated a source of costly and time-consuming clean up.

### VIBCO'S BENEFITS

After installing the VIBCO SCR-60 Adjustable Speed and Force Electric Vibrator the customer received the following benefits:

- Eliminated feeder jams that resulted in product waste
- Greatly reduced production downtime by eliminating the cause of stoppages
- Adjustable speed and force resulted in the correct vibration for handling delicate eggs

### FEEDER VIBRATORS

## "Eggs present a unique packaging challenge..."

They're extremely delicate and when they break - it makes a huge mess. We were having a lot of trouble with jamming at our feeder chute entry point and we were breaking a lot of eggs. Every time it happened, we would need to completely shut down the line for cleaning. It was messy; it was time-consuming; it wasted product. The delicate nature of the eggs made finding a solution difficult. My equipment dealer suggested that I speak with an application engineer at VIBCO. I have to say that I was thoroughly impressed with his knowledge and expertise. By recommending a small adjustable speed and force vibrator, we got just enough vibration to eliminate the jam without breaking any eggs. Great product!"

Production Manager,  
Jason G., Maryland

### Model SCR-60

### Adjustable Speed and Force Electric Vibrator

- 3,200 VPM
- 80 lbs of force
- Watertight Construction
- 50 dB
